### Burndown Explanation

The Burndown was generated using Jira's automatic reports system

### Burndown Analysis

As seen on the burndown, most of our points were added a day or so after we had started the sprint as we realised that there weren't any added when we had added it despite knowing what we assigned to do. However once we had moved on, we managed to maintain a reasonable completion rate. Though we did leave some tasks incomplete at the end. Most of our tasks were marked completed during the mandatory review sessions that occurred in the tuesday tutorials.
